## NEW SLITTING LINE LT7

# WE ARE EXPANDING OUR PRODUCT LINE

Investment in a new slitting line and production hall with crane runway for loading and unloading coil through vehicles extend.

**UP TO 2.100 MM**

With an effective width of up to 2.100 mm and a thickness of 4 mm, our products will provide even better security of supplies with our plans for seven slitting lines in the future:

Custom-made and precise preprocessing in individual widths, including finishing of the parent coils and just-in-time delivery.

What can we do for you?
